

BK-7

Screw-Driven Bale Opener

Bale opener from Gribetz is designed for today's coil specifications and will safely handle innersprings with higher coil counts, heavier wire gauge, and new coil designs.

SPECIFICATION	BK-7
Electric:	220 Volt, 50/60 Hz, 1 phase, 40 AMP
Electrical Motor:	5 HP (3.7 Kw)
Overall Height:	139" (353 cm)
Working Height:	109" (277 cm)
Floor Area Required:	87" x 113" (221 cm x 287 cm)
Crate size/Domestic:	114" x 86" x 31" (290 cm x 219 cm x 79 cm)
Weight:	2,500 lbs. (1,135 kg)
Crate size/Ocean:	115" x 87" x 32" (291 cm x 221 cm x 81 cm)
Weight:	2,600 lbs. (1,181 kg)

The BK-7 bale opener features an Acme screw drive system to eliminate replacing worn drive chains. Its simple and reliable bale opening works for any size bale, including twin, queen, and king sizes.

- Safety rating of 18,000 lbs. (8,175 kg).
- Welded grid members on the top of the platform and additional guards around the edges aid in protecting the operator from flying debris.
- Two-button controls on the control box must be held down during operation to keep the operator away from the bale and other moving parts during opening.
- Control panel includes hour meter for easier maintenance scheduling.
- Drive channels are turned away from the bale zone to reduce friction in work area.
- Safety rods stabilize narrow innersprings.
- Corner guides prevent deformation of border rods during opening.
- Meets all OSHA and CE safety directives

Gribetz® is a collection of the world's leading mattress machinery companies. These Gribetz machinery companies represent leading-edge technology in computerized quilting machines and panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
