

NC2080

Handle Machine for Mattress Borders

Handle machine from Nähtec allows operators to load fabric handle into positioning/loading clamps while machine cycles through previously loaded handle-sewing cycle.

SPECIFICATIONS	NC2080
Normal rate per handle	20 seconds
Stitches per minute	1600

The NC2080's new twist release allows operators to move positioning/loading clamps up and out of the way. Operator can have easier access to sewing machine or work manually.

- Deskills operation.
- Maximizes sewing productivity.
- Sew handles in horizontal alignment.
- Perfect sew pattern each cycle.
- Wide range of handle sizes and styles available.
- Programmable stitch pattern.
- Sews both ends of the handle during the sew cycle.
- Automatically controls complete, perfect sew pattern.
- Automatic thread-trimming.
