Maximum quilt package	1 - layer Knit Tick
	2 - layer 1" quilt foam
	1 - layer backing
Minimum quilt package	1 - layer Knit Tick
	1 - layer 1/2" quilt foam
	1 - layer backing
Electrical	440/3/50/60
Pneumatic	90psi (6 bars)
Safety Standards	Machine CE approved

The Paragon SL is strictly designed for straight-line quilting. It does not feature side-to-side travel in the carriage, enabling the industry's fastest quilting speeds.

- Runs at speeds of up to 1750 rpm.
- Designed to match the needs of high-volume, channel-quilted mattress panels.
- Features Gribetz's well-known, high-quality stitch integrity.

Gribetz® is the world's leading mattress machinery manufacturer with over a century of experience in machine design. Through rigorous stress and strain analyses, and 3D modeling, our engineering team prides itself in building the most durable state of the art machinery in the industry. We specialize in manufacturing high tech computerized quilting machines, panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
