

Portable HMI Quilter Controls

Handheld Quilter Operations Tablet

Quilter operations tablet from Gribetz makes quilting operations more productive by giving operators more freedom and flexible controls.

The Portable HMI handheld quilter operations tablet puts machine operations at your fingertips and can reduce downtime with powerful, mobile maintenance tools. It comes with a magnetic charging cradle that mounts to the quilter control cabinet for convenient wireless charging of the device.

- Can be preloaded with optional Preventative Maintenance software.
- Can connect with the Gribetz service department for real-time service assistance via video feed software.
- Quilter remote start/stop function.
- Speed-bar function.
- Icon display for why quilter stopped.
- I/O status screen.
- PDF of Operations and Parts manual.
- Loop Take Time feature.
- Floater bar state (up/down).
- Maintenance screen information (optional).
- Monitoring of material run-low sensors (optional).

Gribetz® is the world's leading mattress machinery manufacturer with over a century of experience in machine design. Through rigorous stress and strain analyses, and 3D modeling, our engineering team prides itself in building the most durable state of the art machinery in the industry. We specialize in manufacturing high tech computerized quilting machines, panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
