

Trade-Ins, Mechanical Rebuilds, and Electronics Upgrades

Built (and Rebuilt) with Trusted Quality

Trade-ins, mechanical rebuilds, and electronics upgrades from Gribetz allow you to take advantage of new innovations and stretch even greater value out of your machine.

Years of trusted experience and innovative technology go into every component of your Gribetz quilter. When you upgrade or rebuild, take advantage of all this by choosing genuine OEM Gribetz components.

- Keep Gribetz integrity throughout the entirety of your quilter to ensure quicker service-support resolution in the future.
- Eliminate potential confusion that may arise if using mixed vendor components.
- As Gribetz quilting technology continues to expand, be sure the system you choose now will be compatible with future Gribetz innovations.

Depending on the model, a Gribetz upgrade may include the following features:

- Yaskawa Sigma V motors, IEC Controllers, and separate touchscreens.
- Built-in, industry-changing Gribetz intellectual property.
- Posi-Trim™ Tack & Jump® thread “tail” removal.
- Equistitch™ and Pattern Compensation software for maintaining accurate pattern shapes and quality stitch integrity in every sewing direction.
- Easy Point & Sew™ operator controls using language-independent icon controls.
- All classes of three-needle-bar quilt patterns, including creative Tack & Jump® and PatternLink®.
- Intelligent Gribetz BatchMode® to save money by reducing wasted scrap material.
- AutoSchedule™ for greater production efficiency.
- Automatic button-controlled presser foot-height adjustment.

New Gribetz innovations include:

- Integrated internet support via remote access software for online chat with Gribetz technicians, whiteboard training sessions, and more.
- EZ Plant™ web-based remote machine productivity software to monitor quilter/operator performance from your smartphone or other internet-accessible devices.

Gribetz® is the world's leading mattress machinery manufacturer with over a century of experience in machine design. Through rigorous stress and strain analyses, and 3D modeling, our engineering team prides itself in building the most durable state of the art machinery in the industry. We specialize in manufacturing high tech computerized quilting machines, panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
