

## ***Shuttle 1200 Series***

### *High-Speed, Multi-Needle Lockstitch Quilting Machines*

Quilting machines from Gribetz automate your mattress panel production for improved efficiency and greater yield.

SPECIFICATIONS	SHUTTLE 1200
Carriage travel	12" (300 mm)
Number of needle bars	3
Needle bar spacing	3" between bars (76 mm)
Needle spacing	1" (25 mm)
Sewing speed	500/600 RPM
Power	As required

The Shuttle 1200 quilting machine is available in computer-driven (M) and cam-driven (CAM) models. The Shuttle M1200 comes fully integrated with a computerized control system and both models provide reliability in lockstitch quilting machines.

- Designed for all industries, especially where high-production quilting is required.
- Precision quilting machine capable of performing at the highest levels of efficiency.
- Suitable for quilting thick and heavy materials such as mattress panels, bedspreads, comforters, and sleeping bags.
- Handles thin material used in the home textile and apparel industries.
- Allows operator to make on-the-fly adjustments for pattern compensation in width, length, and stitch density.

Gribetz® is the world's leading mattress machinery manufacturer with over a century of experience in machine design. Through rigorous stress and strain analyses, and 3D modeling, our engineering team prides itself in building the most durable state of the art machinery in the industry. We specialize in manufacturing high tech computerized quilting machines, panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
